Plasmacluster Technology

Plasmacluster Ion technology purifies the air by emitting positive and negative ions. It deactivates suspended airborne mould, viruses, dust mites, allergens and bacteria.

Three Filters Reliably Capture Dust, Gas and Odours.

\*Double Deodorizing filter is available in KC-G40M-W.

- Ion Plasmacluster
- 20° Airflow Angle
- Auto Operation
- HAZE Mode\*
- Sleep Mode
- Plasmacluster Ion Spot
- Dust, Odour, Temperature and Humidity Sensor
- Light Sensor
- Child Lock
- Timer (ON/OFF)
- Rotating Humidifying Filter
- HEPA Filter
- Double Deodorizing Filter
- Anti Microbial/Mould Fine Meshed Rear Panel

## Plasmacluster Spot Mode

A high-density concentration of Plasmacluster ions are discharged forward. This is effective in removing odours, bacteria, and viruses clinging in remote areas of the room.

## Rotating Humidifying Mechanism Structure

Comfortable humidity levels, indoors, keeps your skin and throat moisturized and healthy.

Minute water molecules from moisture delivered by vapour humidifying prevent nose and throat dryness.

When humidifying is not performed, the filter disc rotation stops and remains free of water immersion and dries with ventilation, thus keeping the filter disc clean and preventing mould growth.

\*Plasmacluster Spot Mode & Rotating Humidifying Mechanism Structure is only available in KC-G40M-W.
